Graduate Admissions

Write-Up

The Objective

The main Objective of our Project was to improve the Graduate Admissions for the department of MSIS. To enhance the admission process of the MSIS department, having a website through which a Student can get sufficient information is very much necessary. The students should not face any problems with respect to admission and so incorporating all the useful and necessary information in the Department Website is useful to reach out to the students.

Drawbacks of the Current Website:

•The Website is not User-Friendly.

•There is not much information about the Current Faculty.

•No information about the Fee Structure.

•No proper emphasis towards Alumni Network.

•Not enough information about the Coursework.

Solutions:

The website of the MSIS Department was improved to emphasise on the following aspects:

•Keeping the contents simple and providing a User-Friendly Website.

•There is ample information about the Current Faculty and their field of expertise.

•Another important aspect is the inclusion of the Fee Structure so that a Student can plan his/her finances.

•A good emphasis towards Notable Alumni and Alumni Networking.

•Clear and Sufficient information about the coursework.
